

TOUROND CREEK

TRAIL ACCESS IN THE SOUTHWEST

Sandbar Willow
(*Salix exigua*)

Western Painted Turtle
(*Chrysemys picta belli*)

Beaver (*Castor canadensis*)

Green Darner
(*Anax junius*)

Water Strider
(*Gerris buenoi*)

Canada Goose (*Branta canadensis*)

A healthy riparian area (where the land meets the water) functions to enhance and protect water quality. Willows are a staple species for bank stabilization, especially the Sandbar Willow. The presence of beavers allows for natural water retention benefits.
