

WETLAND

NORTHEAST CORNER

Cattail
(*Typha sp.*)

Red-winged Blackbird
(*Agelaius phoeniceus*)

Muskrat (*Ondatra zibethicus*)

Wetlands hold the role of water storage, aquifer recharge, carbon sequestration, and habitat provided for the creatures that call it home. The importance of wetlands in an Agro-environment here in Manitoba is to filter nutrients and buffer extreme events such as flooding or drought.

Mallard Duck (*Anas platyrhynchos*)

Fishing Spider (*Dolomedes triton*)

Northern Leopard Frog (*Rana pipiens*)
